## Formula for GPA:

Add up Totals at the end of each row  
 Divide by number of classes taken  
 Add total with 2 then multiply by 3 and  
 Divide by 5

## Unweighted GPA & Cumulative GPA:

The courses above and the regular column in the diagram (add each column, add the total of each line divide by the number of grades) will be used for the calculation of the unweighted GPA.

For the Cumulative GPA use all the courses student took. Use the regular column, add each column, add the total of each column divide by the number of grades.
